Flag: Follow up

Our current experience is that validated results are taking about 30 days. There are only a few labs that are capable of the analysis and the labs are usually booked.

Here is the cost estimate for the sampling at 2 points in Martinsburg. Let me know if you have any questions. We had a meeting scheduled for Monday to discuss this – is it still necessary? Let me know. Thanks.

Karen

Ruth worked up on estimate, which is attached, for the Martinsburg, WV sampling.

Jerry, Here you go.

There will also be data validation costs with the ESAT contractor at Fort Meade. I think 4 hours should be enough. I am not sure of that contract rate but I think if you go with Ex. 4 CBI hour we should be close.

Ruth
